## ENDURACOR™ DIGITAL PRINT TECHNOLOGY

# Innovative Solutions for all Your Finishing Needs

MOLDINGS | VENTS | STAIR TREADS & RISERS | STARTER STEPS

Digital printing is available on the Enduracor™ line of durable, water-resistant and versatile floor products.

Featuring our exclusive 4-layer design, Enduracor™ is one of the most technologically advanced accessories on the market.

## Expect Only the Best

### WATER PROOF CORE

Artistic Finishes' exclusive Water Proof Core flooring accessory technology. The Water Proof Core is created with only the highest quality materials combined using thermoplastic, injection molding process to create a waterproof flooring accessory solution.

### ADHESIVE BACKER

Our adhesive backer layer provides a high-bond strength that acts as a sealant and ensures a reliable hold to withstand typical daily use and provide years of durability.

### DECORATIVE LAYER

This layer has the ability to complement virtually any flooring line and is digitally-coordinated to look like your flooring line including hardwood, tile, WPC, LVP and LVT.

### TRACK INSERT

This provides installers the option to securely attach the accessory into place with the track system. It also offers more surface area for the adhesive to have contact with the accessory and underlayment, ensuring a strong hold to the subfloor.

### TOP COAT FINISH

Using our nanotechnology and ultraviolet curing process, the highly water-resistant finish and exclusive top coat is created. Its resilience against liquids creates a reliable barrier, shielding the entire product.

GET STARTED TODAY, WITH THE DIGITALLY PRINTED VENEER THAT'S CHANGING THE INDUSTRY.

- Easy and intuitive online ordering
