

ENDURACORTM WATER PROOF CORE

.....

ENDURACOR is an exclusive line of water proof core flooring accessories manufactured to blend to virtually any flooring material. This product line features a four layer design making it one of the most technologically advanced flooring accessories on the market.

.....

MOISTURE

After three wet and dry cycles, which included being submerged in boiling water, there was **ZERO** damage to the wood veneer or the bond between the veneer and the core.

.....

DURABILITY

Using ASTM D905 specified load testing rates, the *Enduracor* product scored an impressive **620 pounds** per square inch (psi) durability rating.

.....

DENSITY

Our average profile density measured at **916kg**/cubic meter. These commercially graded accessories surpassed a comparable flooring sample measuring 700kg/cubic meter.

.....

SAFETY

CARB2 results came back well below the industry standard scoring at .01parts/million. *Enduracor* scored **5x** better than industry standard requirements.

▶ Compliant based on Americans with Disabilities Act (ADA) codes 302.1 and 303

.....

STABILITY

Climate change will **not affect** this product due to the nature of its core. *Enduracor* is an ideal substitute for species prone to warping.

.....
